KOIAS Talk by Mariaenrica Giannuzzi at Kobe University

On March 31, 2025, KOIAS co-hosted a talk by Mariaenrica Giannuzzi from the ATMOS Project at the University of Turin, as part of the ongoing Kobe Philosophy Seminar Series organized by KOIAS member Takuya Niikawa. Her presentation, titled “Embodiment of Deep Time, Affective Geologies and the Atmosphere of Geological Art,” explored how contemporary art configures long-distant pasts and futures through geological imagery and atmospheres.

KOIAS looks forward to further collaborations with Mariaenrica and the ATMOS Project in the future.
