KOIAS Fellows Meeting – Workshop on Situations and Atmospheres with Maximilian Müller at Kobe University

On October 1st, 2025, KOIAS organized a special KOIAS Fellows Meeting in the form of a workshop with KOIAS Fellow Maximilian Müller. In the event, Müller introduced Hermann Schmitz's concepts of "situation" and "atmosphere" and opened them up for discussion in relation to contemporary Atmospheric Studies. After the presentation, participants engaged in an open exchange of ideas, continuing the conversation over drinks. Although the concepts in question remain complicated, everyone agreed that they remained central to the future of Atmospheric Studies.
